Heavyweight champion Sonny Liston predicted Tuesday that his Feb. 25 title match against Cassius Clay at Miami Beach will end inside five rounds "one way or the other."

If you haven't tried the "Shad Rigs" for catching specks, try them. They are proving a mighty fine bait just now.

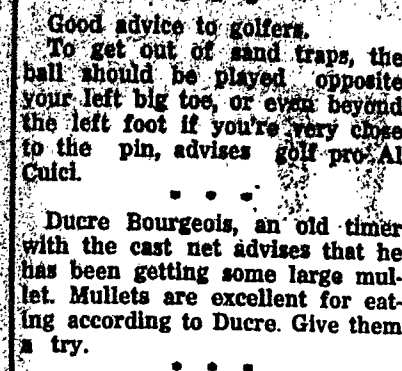

The "Shamrockers" enjoyed a supper last week at Pine Rest restaurant on Highway 90.

Jimmy Stevens is manager and the men were high in their praise for the fine food served. It will pay to visit the Pine Rest.

Paul Okers of Long Beach likes fishing, especially fly fishing. Paul would like to go just any old time, he says.

L. A. Pickens and his wife of Long Beach are ardent anglers. They were after speckles Sunday at the Pass Christian Harbor. The rain didn't stop them.

LOCAL SPORTSMAN

Junior Bourgeois of the Bay, an expert with a cast net has been getting some nice fish off the Highway bridge at night time. He usually keeps his refrigerator full.

Jerry Gordon, a former resident of the Bay paid us a visit. Jerry said he is waiting for the soft shell season to open. He will be ready for them.

Saw Billy Bourgeois the other day. Billy is an ardent fly fisherman and expects to get back to his favorite sport as soon as he catches up on his work. He said he has two good paddlers in his two young sons.

Parnell McKay from the Pass does a lot of fishing in the Harbor and was telling us how many fish he gets.

rolled in an industrial management

coordinated program of production, distribution and finance which is designed to provide the student with an understanding of the procedures necessary to the development and operation of a manufacturing plant - in simpler terms, the know-how from "scratch" to a salable product.

The program consists of guiding the students through procedures of (1) selection of a product which might be produced in Mississippi (2) determining its market potential (3) finding the cost of production and marketing (4) planning programs for training and development of skilled workers (5) planning for the development of procedures to meet all these requirements, with a complete plan for both technical equipment and adequate personnel, and (6) developing plans and procedures for the financing and operation of the business enterprise.

The first step a student takes is to select a product he wishes to manufacture and place on the market - anything from a tooth pick to a complicated mechanical device. The procedure then begins with marketing studies under the direction of Mr. Selby Downer, assistant professor of Marketing. These studies determine the market potential of a proposed product and the feasibility of marketing the item at a profitable price.

If the proposed product does prove feasible, then the student constructs an actual working pilot model of the item. Following this, production processes are planned, factory design determined and effective production procedures determined, including all the technical planning for the complete development and operation of manufacturing facilities.

In this part of the program, under the direction of Dr. William Green, professor of Industrial Management, the student builds a scale model of his proposed manufacturing plant right down to the last detail of where to

store certain types of nuts and bolts.

Coordinated with these procedures is the development of employee training and development procedures, under the direction of Mr. Ned Williams, assistant professor of Economics. This includes all necessary procedures for developing a skilled labor force of employees for the plant.

When the student completes this program of study, he is capable of going out and establishing a manufacturing plant in Mississippi - provided, of course, he can secure adequate financing. And most of the "pot luck" chances of failure have been removed.

Dr. Green commented, "The value of this training in Mississippi is unlimited. The state is rich in raw materials, and when we have developed a force with the knowledge and capability to turn raw materials into finished product for the market, then we will really be on the road to industrialization."

Odds are that if there is a better mousetrap to be built, these eager students will soon have one on the supermarket shelf.

Our Mightiest Hour

Rockets have a certain thrust — and no more. Nuclear bombs have a certain explosive force — and no more. Every powerful device on which man depends for military defense or scientific advance is limited in its energy. But FAITH has no limits. It turns with trusting eyes to the Almighty, whose power is infinite, whose love is everlasting. It is constantly confident and courageous — because its resources cannot be exhausted. In perilous times a great nation always finds its might in spiritual resources. And today, significantly, one of the essential elements of survival in which our stockpile dwarfs the Russians is FAITH. Khrushchev has no secret installation to match the thrust and force generated in the souls of our people by our hundreds of thousands of churches. Think on these things as we worship together next Sunday morning . . .

U. S. BOND SALES INCREASED IN 1963 OVER PREVIOUS YEAR

Mr. Andy J. Becker, Chairman of the County's Savings Bonds Committee, reported that United States Savings Bonds sales had a tremendous increase in Mississippi in December. They amounted to \$1,650,404 compared to \$1,236,232 for December, 1962. Total sales for Mississippi for 1963 were \$17,183,063. Savings Bonds sales for 1963 for the Nation were \$4,760,000,000, a 11 percent increase over 1962.

Sales in Hancock County for December were \$7,255.75 bringing the total for 1963 to \$93,373.25.

He expressed thanks to the people for their interest in the Savings Bonds Program during 1963 and calls on all people to continue their cooperation in 1964. He said, "When people buy U. S. Savings Bonds they help themselves and their country."

In giving the report, he also called attention to two things:

1. All Series E Bonds have been given an extension beyond maturity. Bonds bought May 1, 1941 through May, 1949, can be held 30 years.

Bonds bought since June 1, 1949 have been given a 10-year extension.

2. All people who will be entitled to an income tax refund of \$18.75 or more can ask the Internal Revenue in U. S. Savings Bonds.

men assemble thousands of these units - 61,000 in 1963 alone - for use in local telephone offices from coast-to-coast. Each new unit, involving as many as 3,000 wires and 20,000 switching points, must and does work compatibly with those already in service. And it

must - and does - work reliably time and time again, 24 hours a day for many years.

Such performance is assured by quality manufacture at Western Electric plants in Ohio, Nebraska, Oklahoma, New Jersey and Chicago. Seems there's more to telephone service than meets the eye.

DO,000,000,000,000 CONNECTIONS BEHIND EVERY BELL TELEPHONE

ictured above is just one section of a typical unit of telephone switching equipment. Yet in single view, showing bundles of connecting wires running and there like tendrils of a climbing tropical plant, you get a pretty good idea of the complexity of the system behind every System telephone.

all, 2.6 quadrillion different sections make it possible for one of the more than 65 million phones in the Bell System to reach any other phone in the system by a single connection. Complex switching like the one shown here, right path for calls swiftly, Western Electric (manufacturing of the Bell System) crafts-

MTO CONSTRUCTION WILL CONTINUE ON SCHEDULE - STENNIS

WASHINGTON - Senator John Stennis said that construction of the Mississippi Test Facility would continue on schedule, despite cutbacks in the national space budget.

Noting the President's 1965 space budget is \$800 million less than the 1964 budget for the entire Nation's space program, Stennis said, despite these reductions, we believe the major needs of the Mississippi Test Facility will not be adversely affected.

Stennis noted that "The construction program for the Mississippi operation will continue largely as planned and the necessary money will be provided for this purpose."

"I have been assured that the construction program will move ahead on schedule," Stennis said. He noted that the construction budget for the Mississippi site in Hancock and Pearl River counties was \$78 million in fiscal year 1963, \$93 million in fiscal year 1964, while the amount estimated for use in fiscal year 1965 is only \$80 million.

Stennis, a member of the Senate Aeronautics and Space Committee, said this reduced amount, "is sufficient to take care of the pace of construction now. Construction has moved into the advanced stage and not as much money is required this year."

SIGNUP NEARS FOR 1964 FEED GRAIN PROGRAM

Farmers will have an opportunity to sign up in the 1964 feed grain program early in February, according to Paul E. Boudne, Chairman of the Hancock Agricultural Stabilization and Conservation County Committee. The sign-up period will be for seven weeks from February 10 through March 27.

As in previous years, the chairman explained, the feed grain program will be voluntary and each individual producer on farms growing one of the three feed grains covered by the program will make his own decision about whether to take part. The program is available for corn, grain sorghum, and barley.

To take part in the feed grain program, the farmer will agree to take out of production and devote to an approved conservation use at least 20 percent of the total feed grain base (for all of the three grains grown on the farm). The farmer may divert the acreage of one or more of the feed grains, but his payment will be figured according to the rate applicable to the crop diverted.

Farmers who participate in the program will be eligible for diversion and price support payments, and for price support loans on their 1964 production of the three grains. The price support payments whether the feed grain produced in 1964 is fed on the farm, sold, or placed under a price support loan.

Chairman Boudne points out that two major improvements have been made in the 1964-crop feed grain program as compared with programs of previous years: (1) As much as 50 percent of the total feed grain base may be diverted on any farm (this is up from the 1963 maximum of 40 percent

of the feed grain base) and (2) the average payment 1964 per acre for diverting 40 percent or more of the base will be substantially higher than last year.

Farmers are encouraged to look into the advantages of taking part in the 1964 feed grain program as their present plans for this year may be changed by the time the program signs up.

Shooting classes are held every Saturday from 10 a. m. to 12:30 p. m. in the basement of the Legion home and anyone who wants to join is asked to report at that time.

The Hunter Kimbrough home pictured will be one of the four homes open to guests on the spring Pilgrimage tour.

Miss Veronica Mohr, Spring Pilgrimage chairman, announced this week the 142 year old home at 808 North Beach, recently purchased by Mr. and Mrs. Hunter Kimbrough, will be the second stop on the tour.

The home was recently purchased by the Kimbroughs from the William Holdens of Memphis. Originally a land grant to Louis Lesassier in 1768. The property was purchased by Jesse Cowand and in 1821 he built the home and settled here. In 1857 gables were added to the house which was

originally built on long low lines and it was one of the show places in Bay St. Louis at that time.

While the home was being renovated by the Kimbroughs a workman found a sealed bottle embedded in the wall which contained a copy of the Sea Coast Echo of 1905, featuring the history of Bay St. Louis and a letter written by Gertrude Cowand Penry.

On Leonard Avenue, in the rear of the home, is the Cowand cemetery which is over a century old.

Mrs. Kimbrough will have as her co-hostesses for the tour Mesdames Allan McCaskell Kimbrough, Rene deMontluzin, E. P. Kirkpatrick, J. R. Scharff, Walter Hava and T. J. Garner.

Four 11-year old Gulf Coast children will be chosen this spring to attend (Children's International) Summer Village in France as representatives of the Gulf Coast Chapter of Children's International Summer Villages, Inc.

According to Mrs. William L. Braun, Long Beach, vice president of the Gulf Coast Chapter, 24 children in the age group from Mississippi Coast schools are under consideration for the visit to France.

Two boys and two girls will be sent to the international youth meeting by the chapter.

Children under consideration were recommended by principals and teachers at their respective schools.

Final selection of the four children, to be based on scholarship, leadership ability and outgoing sociability, will be made by a five-member committee representing the Gulf Coast Chapter.

Children selected from Our Lady of the Gulf School were Danny Taylor, son of Dr. and Mrs. C. D. Taylor of Pass Christian, and Linda Richardson, daughter of Mr. and Mrs. J. F. Richardson of Bay St. Louis.

Though it is a workout-machine, the boys are not playing games in this scene from "Mary, Mary", hilarious new Warner Bros. comedy which opens Sunday at the STAR Theatre. Barry Nelson (left), portraying an irate ex-husband,

vents his rage against Michael Rennie, cast as a fading screen-idol, because he has been making love to the former wife.
